

ANTELOPE VALLEY COLLEGE

Welding

Sparking Success!

Whether they're helping build skyscrapers or spaceships, welders perform a critical function in our high-tech, high-rise world. That's why jobs in this industry are burning more brightly than ever! According to the US Department of Labor, California has the second most welding jobs in the nation, with the greater Los Angeles area boasting one of the highest concentrations of welding jobs in the country!

At AVC, welding students get cutting-edge training in industry-standard techniques such as oxyacetylene welding (used in pipe construction and repair work), gas tungsten arc welding (used in the automotive and aerospace industries), and structural welding (used in the construction industry), which can lead to a structural welding certification from the Los Angeles Department of Building and Safety.

In all cases, students master how to read and interpret blueprints and architectural drawings, a vital skill for nearly every aspect of construction and manufacturing. And, whether they're earning a full AA degree or launching their careers quickly with a 24-unit certificate, students get the expert preparation they need to earn the LA City Welder Certification.

If you like working with your hands and have an eye for detail, you could start building a brighter future in AVC's Welding program today!

Degrees & Certificates

 Associate in Science—Welding

 Certificate—Welding

Save time and money on a high-quality education while staying close-to-home!

Your career-focused degree or certificate in Welding is waiting.
