

How can **you** use podcasting?

Review for a test...

Listen to a special guest speaker...

View a friend's class project...

Podcasting has arrived, giving higher education an ingenious way to get audio and video content out to students.

Presentations, performances, lectures, demonstrations, debates, tours, archival footage—school is about to become even more inspiring.

Podcasting puts the power of the iTunes Store to work for colleges, so users can easily search, download, and play course content just like they do music, movies, and TV shows.

Always in session

Podcasting delivers easy, 24/7 access to educational content and educationally focused organizations.

Keeping them motivated

Engaging students on their home turf, podcasting offers audio and video that make subjects more vivid than any printed page ever could.

Learning on the go

Students can sync iTunes with any iPod, another MP3, or an iPhone so they can go right on learning while they catch a meal, walk to class, or work out at the gym.
